

DESCRIPTION:

Premium range of pulverizing mill bowls from 50cc to 5000cc nominal capacity, our comprehensive selection also includes Tungsten carbide and other material options crafted to the highest standards.

The bowls are crafted from Forged steel, followed by a precise heat treatment process. The raw material is held to stringent quality standards ensuring minor trace elements. Raw material batches are all tested by an independent, certified laboratory. Batch reports are available on request. Bowls are all engraved with a serial number linked to the batch number for full traceability.

SIZES:

Bowl Size (Standard & Chrome)	Charge Quantity (Mass)
